
Medicaid & CHIP:
February 2014 Monthly Applications, Eligibility Determinations, and Enrollment
Report
April 4, 2014

Background

This report is the fifth in a series of monthly reports on state Medicaid and Children’s Health Insurance Program (CHIP) data, and represents state Medicaid and CHIP agencies’ eligibility activity for the calendar month of February 2014, which coincides with the fifth month of the initial open enrollment period for the Health Insurance Marketplace (“Marketplace” hereafter). This report includes state data and analysis regarding applications to Medicaid and CHIP agencies and the State Based Marketplaces (SBMs) and eligibility determinations made by the Medicaid and CHIP agencies. New for this month, this report also includes state data on total enrollment in the Medicaid and CHIP programs.

The Affordable Care Act created a “no wrong door” policy, which means that individuals can apply for health coverage through the Marketplace or the Medicaid or CHIP agency (if it is a separate agency) in their state. Regardless of which “door” they choose, individuals can get eligibility determinations for all types of health coverage, including financial assistance to help pay for coverage, and have their accounts routed to the program for which they are eligible. This means that for a full picture of Medicaid and CHIP activity, the numbers in this report—which come from the state level—need to be understood in concert with the numbers previously reported on Health Insurance Marketplace enrollment.¹

The data included in this report were submitted to CMS from state Medicaid and CHIP agencies as part of the Medicaid and CHIP Performance Indicator process and supplement data on Marketplace activity released by the Department of Health and Human Services (HHS). Through the Medicaid and CHIP Performance Indicator process, states report on a common set of indicators designed to provide information to support program management and policy-making. State Medicaid and CHIP programs submit data to CMS on a range of indicators related to application, eligibility and enrollment processes. States are still transitioning to the standardized data definitions described in Appendix A, which limits the conclusions that can be drawn from the data.

¹As noted, this report includes data on applications submitted and determinations made at the state level. That is, those applications submitted directly to Medicaid and CHIP agencies as well as -- because of the integration with State-Based Marketplaces (SBMs) -- applications for financial assistance to Marketplaces that are operated by states, and the Medicaid and CHIP eligibility determinations those entities have made. Accordingly, in SBM states, the data include Medicaid and CHIP applications and determinations that were reported in the [Health Insurance Marketplace: Enrollment Report](#) (in other words, these data are reported in both reports). For Federally-Facilitated Marketplace (FFM) states, the applications included in this report do not include applications made to the FFM which are reported in the *Health Insurance Marketplace: Enrollment Report*. In FFM states, some of the individuals assessed or determined eligible for Medicaid or CHIP by the FFM and reported in the *Health Insurance Marketplace: Enrollment Report* may also be reported here when the state has made an eligibility determination based on the information provided by the FFM.

Medicaid & CHIP February 2014 Monthly Applications, Eligibility Determinations, and Enrollment Report

As with previous reports, this report focuses on those monthly indicators that relate to key processes relevant during open enrollment: the number of applications submitted directly to Medicaid and CHIP agencies, including those received through State-Based Marketplaces (SBMs), and the number of eligibility determinations made by Medicaid and CHIP agencies on the applications described above, as well as applications to the Federally-Facilitated Marketplace (FFM) in states for which the FFM makes an eligibility assessment (and the state then completes the Medicaid determination). This month we are adding information on the total number of individuals enrolled in the Medicaid and CHIP programs. As with each monthly report, given that states are reporting monthly data to CMS soon after the close of the month, the February data presented in this report should be considered preliminary. We have also published updated data for January applications and eligibility determinations [on Medicaid.gov](http://on.Medicaid.gov), which includes a more complete data set than the preliminary January data reported last month.

In terms of the data included in this report, it is important to note that Medicaid and CHIP are longstanding programs that serve many populations in addition to those that might be newly eligible for Medicaid under the new low-income adult group. Therefore, this report, which measures eligibility and enrollment activity for the entire Medicaid and CHIP programs, necessarily captures data beyond the newly eligible individuals in states that have expanded Medicaid coverage. In addition, this report includes data from all states, not just those that have adopted the new low-income adult group. Changes in eligibility and enrollment processes ushered in by the Affordable Care Act, which are discussed below, are in effect in all states and are likely to promote coverage among previously eligible but uninsured adults and children. The data elements are explained more fully in Appendix A.

All 50 states and the District of Columbia (“states” hereafter) are in the process of implementing the Affordable Care Act simplifications to the Medicaid and CHIP application and eligibility determination processes and making technology upgrades to transition to streamlined, data-driven eligibility determination systems. As states shift to these new eligibility and enrollment systems, we will continue to see improvements in reporting capacity. For more information about the eligibility and enrollment simplifications and improvements states are making to their programs, please see Appendix B.

**Medicaid & CHIP
February 2014 Monthly Applications, Eligibility Determinations, and Enrollment Report**

Medicaid and CHIP February 2014 Enrollment Data Highlights

	February Monthly in All States Reporting²	February Monthly in States also providing baseline data³
Total Individuals Enrolled in Medicaid and CHIP (includes all individuals enrolled in the program on the last day of the reporting period)	62,305,137	61,032,021

- Across the 48 states that provided enrollment data for February 2014, states reported that approximately 62.3 million individuals were enrolled in Medicaid and CHIP. This enrollment count is point-in-time (on the last day of the month) and includes all enrollees in the Medicaid and CHIP programs who are receiving a comprehensive benefit package.⁴
- Among the 46 states (including the District of Columbia) reporting both February 2014 enrollment data and data from the July-September of 2013, pre-open enrollment baseline period, approximately 61.0 million individuals were enrolled in Medicaid and CHIP in February, a gain of 3.0 million additional individuals and 5.2 percent increase over the average monthly enrollment for July through September of 2013.⁵
- Among states that adopted the Medicaid expansion and whose expansions were in effect in February 2014, Medicaid and CHIP enrollment rose by 8.3 percent compared to the July-September 2013 baseline period, while states that are not expanding Medicaid reported a 1.6 percent increase over the same period.⁶

² See State-by-State Table notes for state-specific caveats regarding the reported data. The following states did not submit enrollment data for February: Connecticut and North Dakota. Maine's data is also omitted because it was not comparable to the data submitted by other states. It is important to note that the enrollment measure is a total count of enrollment in Medicaid and CHIP, not solely a count of those newly enrolled during the reporting period. Individuals who are only eligible for limited benefits under the Medicaid and CHIP programs (e.g., emergency Medicaid, family planning-only coverage, limited benefit dual eligible individuals, and Medicaid 1115 demonstration populations with limited benefits) are excluded from this indicator in all reporting periods.

³ See State-by-State Table notes for state-specific caveats regarding the reported data. Calculated including only the 46 states that provided data for both periods (Connecticut, Delaware, North Dakota and Missouri are excluded because of missing data). Maine's data is also omitted because it was not comparable to the data submitted by other states.

⁴ See footnote 2.

⁵ See footnote 3.

⁶ Percentage calculations are based only on states reporting in both February and the July through September, 2013 baseline period. Michigan and New Hampshire are not included in this percentage, because the expansions in those states were not yet implemented as of February.

Medicaid & CHIP February 2014 Monthly Applications, Eligibility Determinations, and Enrollment Report

- 12 of the 22 expansion states whose expansions were in effect in February 2014 and that reported relevant data for both February and the baseline period experienced an enrollment increase of 10 percent or more.⁷

Note that the February 2014 enrollment numbers understate total Medicaid and CHIP enrollment because not all states are reporting, the data are preliminary, and the data do not include most individuals who will later be found eligible for Medicaid or CHIP effective in February through retroactive coverage. The data also understates enrollment effective in February because of some delays in sending, receiving and/or processing applications between the FFM and states. The total count of Medicaid and CHIP enrollments based off of these account transfers from the FFM is not yet reflected in the reported enrollment figures. Medicaid and CHIP eligible individuals whose application will be fully processed after February 28th will be enrolled effective back to the date of application or the first of the month; those enrollments are not reflected in these preliminary data. These enrollment data may differ from other published state and national enrollment figures because they only include individuals with comprehensive benefits; for example, individuals only receiving limited coverage for family planning services and those who are partial benefit Medicare-Medicaid beneficiaries are not included in this data.⁸ See Appendix A for more information on this methodology.

⁷ Expansion states with a greater than 10 percent increase in enrollment are: Arkansas, Colorado, Iowa, Kentucky, Maryland, Massachusetts, Nevada, Oregon, Rhode Island, Vermont, Washington, and West Virginia. Among expansion states, the percent change in the number of individuals enrolled varies based on the size of the coverage expansion that is occurring in 2014. States that previously offered comprehensive coverage to many adults under 133 percent of the federal poverty level will see a smaller increase than those who previously offered only coverage for very low-income parents. Additionally, in most states that provided Medicaid coverage to adults above 133 percent of the federal poverty level prior to 2014, those individuals are no longer eligible for or enrolled in Medicaid and instead may be eligible to purchase coverage in a for qualified health plan through the Marketplace, and may be eligible for advanced payments of the premium tax credits and cost-sharing reductions. Michigan and New Hampshire are not included because the expansions in those states were not yet implemented as of February.

⁸ See State-by-State Table notes for state-specific caveats regarding the reported data. See footnote 2 for additional description of the populations that are excluded from the enrollment indicator.

**Medicaid & CHIP
February 2014 Monthly Applications, Eligibility Determinations, and Enrollment Report**

Medicaid and CHIP February 2014 Application and Eligibility Data Highlights

	February 2014 Monthly in All States Reporting	October 1, 2013 through February 28, 2014
Total Applications for Financial Assistance Initially Received by State Medicaid and CHIP Agencies (note that more than one individual may be included on an application and renewals are included in some states)	2,207,513 ⁹	11,788,700 ¹⁰
Total Individuals Determined Eligible for Medicaid and CHIP by State Agencies (includes those newly eligible under the Affordable Care Act and those eligible under prior law and, for some states, renewals)	2,249,120 ¹¹	11,713,246 ¹²

See the Eligibility Data tab [on Medicaid.gov \(http://medicaid.gov/AffordableCareAct/Medicaid-Moving-Forward-2014/Medicaid-Moving-Forward-2014.html\)](http://medicaid.gov/AffordableCareAct/Medicaid-Moving-Forward-2014/Medicaid-Moving-Forward-2014.html) for October, November, December 2013, and January 2014 data on both applications and determinations. Please note that February has fewer calendar days than other months, which may impact the volume of applications and determinations in comparison to other months.

During the month of February, states reported receiving a total of approximately 2.7 million applications for financial assistance (including Medicaid and CHIP coverage, tax credits and subsidies); this includes approximately 2.2 million applications for financial assistance through their Medicaid and CHIP agencies

⁹ See State-by-State Table notes for state-specific caveats regarding the reported data; because of reporting capability some states included some renewals in these data. New York and Washington did not provide February 2014 application data. Tennessee only provided application data on their CHIP program.

¹⁰ See State-by-State Table notes for state-specific caveats regarding the reported data; because of reporting capability some states included some renewals in these data. This information was calculated using updated monthly application data from states for October 2013 through January 2014. See the Eligibility Data tab [on Medicaid.gov](http://medicaid.gov) for preliminary and updated data from October 2013 through January 2014.

¹¹ See State-by-State Table notes for state-specific caveats regarding the reported data; because of reporting capability some states reported some renewals in these data. Massachusetts, North Dakota, and Washington did not provide February 2014 determination data. Tennessee only provided determination data on their CHIP program.

¹² See State-by-State Table notes for state-specific caveats regarding the reported data; because of reporting capability some states included some renewals in these data. The information was calculated using updated monthly determinations data from states for October 2013 through January 2014. See the Eligibility Data tab [on Medicaid.gov](http://medicaid.gov) for preliminary and updated data from October 2013 through January 2014.

Medicaid & CHIP February 2014 Monthly Applications, Eligibility Determinations, and Enrollment Report

and an additional 0.5 million applications through SBMs).¹³ Note that this report does not include applications received at the FFM and subsequently transferred to state Medicaid or CHIP agencies.

States reported approximately 2.25 million eligibility determinations for Medicaid and CHIP in February 2014 for individuals applying for coverage: approximately 1.3 million determinations in states expanding Medicaid and 0.9 million in non-expanding states. As described above and in prior reports, this figure includes all of state Medicaid and CHIP agencies' determinations for individuals eligible under prior law, as well as through the Affordable Care Act; note that, due to limitations on the data some states are able to report, the number of determinations includes renewals in those states.¹⁴ Additionally, the determination number does not represent unique individuals, as an individual may have more than one eligibility determination. This report also reflects the continuation of administrative transfers in Oregon and new administrative transfer activity in California, discussed further below. It is important to keep in mind that differences in volume of administrative transfers and other types of one-time enrollment activities can affect month-to-month comparisons of eligibility data. When submitting their February data, states also submitted updates to their January 2014 data. The approximately 11.7 million determinations in the table above is the sum of 8.93 million determinations reported last month, approximately 2.25 million determinations in February, and approximately .53 million in updated January determinations.

See the **Eligibility Data** tab on Medicaid.gov at <http://medicaid.gov/AffordableCareAct/Medicaid-Moving-Forward-2014/Medicaid-Moving-Forward-2014.html> for preliminary and updated data on applications and determinations for October 2013 through January 2014.

¹³ The following states have included renewals in their February 2014 application data: Nevada, New Mexico, Ohio, and Pennsylvania.

¹⁴ These states have included renewals in their February 2014 determination data: Alaska, District of Columbia, Iowa, Maryland, Michigan, Nevada, North Dakota, New Mexico, Rhode Island, South Dakota, Texas, Utah, and Virginia. Some of these renewals are conducted without the individual submitting a new application, using information already in the system that the individual is asked to verify.

**Medicaid & CHIP
February 2014 Monthly Applications, Eligibility Determinations, and Enrollment Report**

Administrative Transfers: Success in Five States

Total Individuals Determined Eligible through Administrative Transfer, September 2013 -February 2014	
Arkansas	63,465
California	145,661
Illinois	35,900
Oregon	137,483
West Virginia	70,574
Total	453,083

In response to [CMS guidance](#) provided on May 17, 2013, some states are employing a new tool for facilitating Medicaid enrollment to conduct an “administrative transfer” to Medicaid. This method uses supplemental nutritional assistance program (SNAP) income data information that states already have to identify individuals who are likely eligible for Medicaid and CHIP. As of the end of February, five states had implemented this strategy and almost half a million individuals have been determined eligible for Medicaid or CHIP as a result of this new authority granted to states while they implement their eligibility and enrollment systems.¹⁵

Data Limitations

CMS established a common set of definitions for consistency in reporting the Medicaid and CHIP performance indicators; these definitions appear in Appendix A. States are at various points in the process of transitioning from their historic definitions to the updated standardized reporting specifications. Where states have provided data that vary from the specifications, we have noted that information in notes in the State-by-State table.

State-by-State Table

Below is a table with state-specific data on Medicaid and CHIP applications and eligibility determinations for the month of February 2014, followed by a table showing the total number of people enrolled in state Medicaid and CHIP programs in both January and February. The description of each data element included in the table is available in Appendix A. Unless otherwise noted, the reporting period for all elements is February 1-28, 2014.

Future Reports

In future months, we will continue to expand the number of performance indicators which we include in this report.

¹⁵ One additional state, New Jersey, has been approved to use the administrative transfer enrollment strategy. New Jersey currently plans to implement the strategy in April.

*=state has adopted "early MAGI".

^=expansion not effective until April 1, 2014 (Michigan) or July 1, 2014 (New Hampshire, requested date subject to CMS approval).

(-)=state has not reported data.

Column III is calculated for only those states that reported both monthly data and baseline data.

Partnership, Plan Management, SB-SHOP, Supported SBM are all types of FFM.

Arkansas	(VI)	Includes CHIP.
California	(I)	Data are preliminary and will be not be fully reconciled until February 2014.
California		Reflects primarily newly-determined and likely eligible Medicaid applicants,
California		as well as some ongoing caseload activity conducted via the state's health exchange automation system.
California	(II)	Does not include applications received by CHIP agency.
California	(IV)	Data are preliminary and will be not be fully reconciled until February 2014.
California		Includes applications to SBM that did not request financial assistance.
California	(VI)	Data are preliminary and will be not be fully reconciled until February 2014.
California		Determinations 'at application' is derived by considering prior coverage.
California		Includes those determined eligible and 'contingently eligible.' Includes CHIP.
California		Includes 145,661 individuals eligible via targeted enrollment strategy.
California		Reflects primarily newly-determined and likely eligible Medicaid applicants
California		as well as some ongoing caseload activity conducted via the state's health exchange automation system.
California	(VII)	Data reflects only those determinations made by the separate CHIP agency and does not reflect all CHIP determinations.
Colorado*	(I)	State Medicaid agency hosts SBM portal; number includes all applications for insurance affordability programs.
Connecticut	(I)	Data may include some duplication of applications between Medicaid and CHIP.
Connecticut	(VI)	Count is of households, not individuals. Includes determinations of some non-title XIX programs made by the Medicaid agency.
Connecticut		(state funded medical cases, the AIDS Drug Assistance program and refugee cases).
Connecticut		Only includes determinations made by the Medicaid agency.
Connecticut		Excludes those determined Medicaid-eligible by the SBM.
District of Columbia*	(VI)	Includes all determinations (e.g., renewals); includes CHIP.
Hawaii*	(I)	State Medicaid agency hosts SBM portal; number includes all applications for insurance affordability programs.
Iowa	(VI)	Includes renewals.
Iowa	(VII)	Includes renewals.
Maryland	(IV)	Includes State Medicaid Agency data and SBM data from 2/1 - 2/28.
Maryland		Includes all applications not only those requesting financial assistance.
Maryland	(VI)	Includes renewals. Includes State Medicaid Agency data and SBM data from 2/1 - 2/28.
Maryland	(VII)	Includes renewals. Includes State Medicaid Agency data and SBM data from 2/1 - 2/28.
Massachusetts	(VI)	Data are preliminary and are derived.
Michigan	(VI)	Includes renewals.
Michigan	(VII)	Includes renewals.
Minnesota	(I)	Count is of persons applying, not applications. Does not include applications to the new eligibility and enrollment system.
Minnesota	(VI)	Includes CHIP.
Nevada*	(I)	Includes renewals.
Nevada*	(II)	Includes renewals.
Nevada*	(VI)	Count is of households, not individuals. Includes renewals.
New Hampshire	(VI)	Data is derived by considering prior coverage; includes CHIP.
New Jersey*	(VI)	Does not include all eligibility determinations; county welfare agencies determinations are not included in this data.
New Jersey*	(VII)	Does not include all eligibility determinations; county welfare agencies determinations are not included in this data.
New Mexico	(I)	Includes renewals.
New Mexico	(VI)	Includes all determinations (e.g., renewals); includes CHIP.
New York	(VI)	Data are preliminary.

Medicaid and CHIP: February 2014 Monthly Applications and Eligibility Determinations

New York	(VII)	Data are preliminary.
New York	(VIII)	Data are preliminary.
North Dakota	(VI)	Includes renewals.
Ohio	(I)	Includes renewals. May include some applications only for other benefits, not for Medicaid and CHIP.
Ohio	(II)	Includes renewals. May include some applications only for other benefits, not for Medicaid and CHIP.
Ohio	(VI)	Includes CHIP.
Oregon*	(VI)	Count is of households, not individuals; includes CHIP.
Oregon*		Includes 6,908 individuals determined eligible via Targeted Enrollment Strategy.
Rhode Island	(I)	Includes applications submitted to SBM. Does not include applications in legacy system for certain non-MAGI populations.
Rhode Island	(VI)	Includes only determinations through new MAGI system. Includes renewals.
Rhode Island	(VII)	Includes only determinations through new MAGI system.
Washington*	(VI)	Determinations 'at application' is derived by considering prior coverage.

*=state has adopted "early MAGI".

(-)=state has not reported data.

Column III is calculated for only those states that reported both monthly data and baseline data.

Partnership, Plan Management, SB-SHOP, Supported SBM are all types of FFM.

Percent change figures exclude TN, which only reports CHIP data.

Alaska	(I)	Includes applications previously reported in October through December that are undergoing MAGI determination.
Alaska	(VI)	Count is of households, not individuals; includes CHIP.
Alaska		Includes renewal determinations from previous non-MAGI Medicaid cases.
Alaska	(VIII)	Includes renewal determinations from previous non-MAGI Medicaid cases.
Kansas*	(I)	Includes MAGI populations only.
Kansas*	(II)	Includes MAGI populations only.
Kansas*	(VI)	Includes MAGI populations only.
Maine	(II)	Baseline excluded because January applications not reported.
North Carolina	(VI)	Count for non-MAGI is of households, not individuals.
North Carolina	(VII)	Count is of households, not individuals.
Oklahoma*	(VI)	Includes MAGI determinations only.
Pennsylvania	(I)	Includes renewals.
Pennsylvania	(II)	Includes renewals.
South Dakota	(VI)	Includes all determinations (e.g., renewals); includes CHIP.
Tennessee	(I)	Data are from CHIP agency only. Medicaid reporting capability in development.
Tennessee	(III)	Excluded because data is only from CHIP agency.
Texas	(VI)	Includes renewals and CHIP.
Utah	(I)	Includes applications for non-health coverage programs.
Utah	(VI)	Includes renewals and CHIP.
Virginia*	(VI)	Includes renewals.
Virginia*	(VII)	Includes renewals.

APPENDIX A

Each of the columns in the table is described here with a column number (I-XIII).

A Note about Federally-Facilitated Marketplace Types: Federally-Facilitated Marketplaces (FFMs) can take several forms, including the State Partnership Marketplace (Partnership), States performing Plan Management functions (Plan Management), Supported SBMs, and the State-Based Small Business Health Options Program (SB-SHOP). These models are referenced in the State-by-State Table. All of these models are referred to as an “FFM” in this Report.

Application Data Elements

New Applications Submitted to Medicaid and CHIP Agencies (I)

Number of applications received by the Medicaid agency, a separate CHIP agency (if one exists in the state), or both during the reporting period. Includes applications received online, via mail, in person or phone. Does not include applications submitted to a State-Based Marketplace (SBM) or the Federally-Facilitated Marketplace (FFM) (the SBM number is reported in column IV). It should be noted that data reflected in this performance indicator are not a count of individuals, as more than one person may be included on a single application. As states are transitioning to new systems, they may not be able to report applications received across all aspects of their programs or systems. See the state-specific notes in the table for further information about state limitations in this area.¹⁶

Pre-Affordable Care Act Monthly Average Applications Submitted to Medicaid and CHIP Agencies (July-Sept 2013) (II)

Average number of applications received each month during the July-September 2013 period (baseline period) by the Medicaid agency, a separate CHIP agency (if one exists in the state), or both, displayed to provide context regarding the average number of applications states received in the period immediately before open enrollment. Not all states submitted three months of data; the average is calculated using any months of baseline data that were provided.

Percentage Change (III)

The percentage change in **Applications Submitted to Medicaid and CHIP Agencies** as compared to **Pre-ACA Monthly Average Applications Submitted to Medicaid and CHIP Agencies (July-Sept 2013)**. In cases where there is a negative percentage change, this may be due to the preliminary nature of the monthly data (as described above) as compared to the finalized nature of the baseline data or because applications that may have previously come to an online portal operated by Medicaid and CHIP agencies are now being submitted through the Marketplace online application.

¹⁶ As described in the state-specific notes in the tables, some states included renewals in the total count of applications received by Medicaid/CHIP agencies.

Applications for Financial Assistance Submitted to the State-Based Marketplace (IV)

Number of applications requesting financial assistance (Medicaid, CHIP or the Advanced Premium Tax Credit and Cost-Sharing Reductions) that have been received by the SBM during the reporting period. This number is different from the number reported in the *Health Insurance Marketplace: January Enrollment Report* because the “Total Number of Completed Applications” provided in that report included applications requesting financial assistance, as well as applications that did not request financial assistance. In contrast, this report is focused on only those applications requesting financial assistance because those applications are evaluated for Medicaid and CHIP eligibility by the integrated eligibility systems that exist in SBM states.

Total Applications for Financial Assistance Submitted at the State Level (V)

For states with an SBM, the data reflect the total of **Applications Submitted to Medicaid and CHIP Agencies** plus **Applications for Financial Assistance Submitted to the State-Based Marketplace**. For FFM states, the data reflect **Applications Submitted to Medicaid and CHIP Agencies**. For SBM states, the data include all applications for financial assistance; individuals on these applications will be determined eligible for Medicaid, CHIP or Advanced Premium Tax Credits and Cost-Sharing Reductions, or determined ineligible for financial assistance.

Eligibility Determination Data Elements

Individuals Determined Eligible for Medicaid at Application (VI)

Total number of individuals determined eligible for Medicaid (under title XIX of the Social Security Act) during the reporting period based on applications for coverage submitted to any state agency (Medicaid, CHIP or the SBM) or based on an administrative determination authorized under a targeted enrollment strategy approved by CMS.¹⁷ The unit of measurement is a count of individuals (as compared to the application numbers, which may include multiple people in one application). This number includes all determinations on applications made within the reporting period—some of those determinations are on applications reported in the **Applications** data, and some are on applications received prior to the reporting period. This does not include determinations made at a periodic redetermination or because of a change in circumstance for a current beneficiary.¹⁸ The unit of measurement is people with determinations completed; this is not an unduplicated number of unique individuals because an individual may have more than one determination within the reporting period. For example, individuals are first determined based on MAGI, and if needed, may request a subsequent determination based on non-MAGI factors. A list of which eligibility groups are MAGI and which are non-MAGI is available [on Medicaid.gov](#).

¹⁷ Information on targeted enrollment strategies and the states approved for these strategies is available here: <http://www.medicaid.gov/AffordableCareAct/Medicaid-Moving-Forward-2014/medicaid-moving-forward-2014.html>.

¹⁸ As described in the state-specific notes in the tables, some states, due to data limitations, could not provide data that met our specifications. Notes are provided in cases where the state included renewals in this data element.

As states are transitioning to their new systems, they may not be able to report determinations being made across all aspects of their programs or systems (i.e., the legacy systems they are winding down and the new eligibility systems they are implementing). See the notes in the table for further information about state limitations in this area.

In states receiving account transfers from the FFM in January where the FFM makes an eligibility assessment (and the state then completes the Medicaid determination), this number includes determinations made on accounts assessed as eligible and transferred from the FFM. In other states, where the state has delegated to the FFM the authority to make Medicaid eligibility determinations, the report does not include the FFM determinations, because the Medicaid/CHIP agency is not performing the determinations, and instead is accepting the account transfer and proceeding with enrollment steps. Individuals determined eligible by the FFM are included in the Total Enrolled indicators. For more information about the assessment and determination models in FFM states see Medicaid.gov.

Individuals Determined Eligible for CHIP at Application (VII)

Total number of individuals determined eligible for CHIP (under title XXI of the Social Security Act) during the reporting period that follows the applicant submitting an application for coverage to any state agency (Medicaid, CHIP, or the SBM). This number includes all determinations at application made within the reporting period—some of those determinations are on applications reported in the **Applications** data, and some are on applications received prior to the reporting period. As states are transitioning to their new systems, they may not be able to report determinations being made across all aspects of their programs or systems (i.e., the legacy systems they are winding down and the new eligibility systems they are implementing). See the footnotes in the table for further information about state limitations in this area. The unit of measurement is people with determinations completed; this is not an unduplicated number of unique individuals.

In states receiving account transfers from the FFM in January where the FFM makes an eligibility assessment (and the state then completes the CHIP determination), this number includes determinations made on accounts assessed as eligible and transferred from the FFM. In other states, where the state has delegated to the FFM the authority to make a CHIP eligibility determination, the report does not include the FFM determinations, because the Medicaid/CHIP agency is not performing a determination, and instead is accepting the account transfer and proceeding with enrollment steps. Individuals determined eligible by the FFM are included in the Total Enrolled indicators. For more information about the assessment and determination models in FFM states see Medicaid.gov.

Total New Determinations (VIII)

The total of **Individuals Determined Eligible for Medicaid at Application** plus **Individuals Determined Eligible for CHIP at Application**.

Enrollment Data Elements

Total Medicaid and CHIP Enrollment, January 2014 (updated) (IX)

Total Medicaid and CHIP Enrollment, February 2014 (preliminary) (X)

The total unduplicated number of individuals enrolled in Medicaid and CHIP as of the last day of the reporting period, including those with retroactive, conditional, and presumptive eligibility. This indicator is a point-in-time count of total program enrollment, and is not solely a count of those newly enrolled during the reporting period. This number includes only those individuals who are eligible for comprehensive benefits (e.g., emergency Medicaid, family planning-only coverage and limited benefit dual eligible individuals are excluded). Medicaid 1115 Waiver populations are included as long as the benefits and networks are comprehensive. CHIP children subject to a waiting period or premium lock-out period are considered eligible but not enrolled and are not included. February data was submitted in March, and is preliminary.¹⁹ January data may have been updated in March, and may include more individuals with retroactive eligibility. Other reporting on Medicaid and CHIP enrollment by states and researchers often may include some beneficiaries excluded in this data (because comprehensive coverage is not provided), or otherwise use a different methodology.

Pre-ACA Monthly Average Medicaid and CHIP Enrollment (July-Sept 2013) (XI)

The average number of individuals enrolled in Medicaid and CHIP for each month during the July-September 2013 period using an average of enrollment numbers submitted by the states for each month in this period. Not all states submitted three months of data; the average is calculated using any months of baseline data that were provided. The unit of measurement is individuals enrolled as of the last day of the reporting period (month). This baseline data include more retroactive enrollments than the February data, which makes change between the July through September period and the February preliminary data look smaller than it would be if retroactive enrollments were excluded from the data for the July-September, 2013 period.²⁰ Such exclusions were not possible.

% Change From Pre-ACA to February 2014 (XII)

The percentage change in **Total Medicaid and CHIP Enrollment, February 2014 (X)** as compared to **Pre-ACA Monthly Average Medicaid and CHIP Enrollment (July-Sept 2013) (XI)** is calculated for States that provided data for both periods. In cases where there is a negative percentage change, this may be due to a number of factors, including the preliminary nature of the monthly data (as described above) as compared to the finalized nature of the baseline data. Changes in enrollment levels are driven by the number of newly enrolled individuals as well as by the number of individuals whose coverage has terminated.

¹⁹ In Medicaid, individuals are potentially eligible for retroactive eligibility to cover incurred health care costs up to 90 days prior to the date of application. Under the Performance Indicator process states initially submit their monthly enrollment data just a week after the month closes, and then update their data one month later. Therefore, the Performance Indicator enrollment counts will always be slightly understated, as they will not include all individuals granted retroactive eligibility.

²⁰ See footnote 22.

APPENDIX B

Eligibility and Enrollment Simplifications and Improvements for Medicaid and CHIP

All 50 states and the District of Columbia are in the process of implementing the Affordable Care Act simplifications to the Medicaid and CHIP application and eligibility determination processes and making technology upgrades to transition to streamlined, data-driven eligibility determinations. One of the biggest changes is the move to a new Modified Adjusted Gross Income (MAGI) methodology for many Medicaid eligibility groups and for CHIP, so that eligibility is determined consistently for Medicaid, CHIP and other insurance affordability programs available in the Marketplace. More information about MAGI is available [on Medicaid.gov](http://on.Medicaid.gov). Many states chose to move to MAGI even before the January 2014 effective date—this has helped make eligibility during open enrollment easier because the same rules could be applied to assess 2013 eligibility as are now being applied to evaluate eligibility that became effective January 2014. A list of states that have implemented “early MAGI,” as well as other strategies that help to improve the eligibility and enrollment process is available [on Medicaid.gov](http://on.Medicaid.gov).

In many cases, information about a state’s status in transitioning to MAGI and to new, modernized information technology (IT) systems and other infrastructure improvements can be helpful in understanding the state-level data reported. Profiles about each state’s current status can be found [on Medicaid.gov](http://on.Medicaid.gov). As states implement their new eligibility and enrollment systems, many states are still operating their existing legacy systems. This can complicate the reporting process for states. In cases where a state was unable to report an indicator, a dash (“-”) appears; states expect to be able to provide this data in future reports. If an indicator is not applicable to a given state, “N/A” (not applicable) appears.

Coverage Expansion

As of February 2014, twenty-four states and the District of Columbia have expanded Medicaid coverage under the Affordable Care Act to adults under age 65 with incomes up to 133 percent of the Federal Poverty Level in 2014. Two additional states, Michigan and New Hampshire, will implement this expansion of Medicaid coverage in future months. This number is subject to change; there is no deadline for when a state must decide whether to expand and states are continuing to consider their options. The number of people impacted by the Medicaid expansion varies; some of these states had previously expanded coverage to parents and other adults at income levels above the level required under federal law before the Affordable Care Act. Many other states previously covered parents only at the minimum required income levels and often did not cover other non-disabled adults at all.
