9:30 – 10:30 a.m. **Health Insurance Exchanges: Goals and Strategies** **Galaxy**

This session will examine the potential value of state-based health insurance exchanges. What do states need to understand regarding whether they want their exchange to be a market organizer or an active purchaser? What are the important issues related to procurement and contracting dynamics with qualified health plans? Panelists will discuss how local market dynamics (carriers/providers) can affect the goals of an exchange.

Panelists

Enrique Martinez-Vidal
Director, State Coverage Initiatives

8:30 – 9:30 a.m. **Key Drivers of Cost Growth** **Galaxy**

The United States spends far more than any other country on health care and yet this is not correlated with improved health outcomes or high quality and efficiency in the delivery of services. This plenary will lay the foundation for the day's discussion by identifying key cost drivers in the health care system.

Jonathan Gruber
Professor of Economics
MIT Department of Economics

9:30 – 11:00 a.m. **Approaches to Slowing Cost Growth in Public Programs** **Galaxy**

States can make high quality health care services accessible to a broader population when efforts are taken to increase the efficiency of public programs like Medicaid, the Children's Health Insurance Program and state employee health plans. Panelists will share strategies that—with an eye toward improving quality and decreasing cost growth—focus on high-cost populations; engage in value-based purchasing; and encourage consumer engagement strategies.
